

Alaska to Migration down

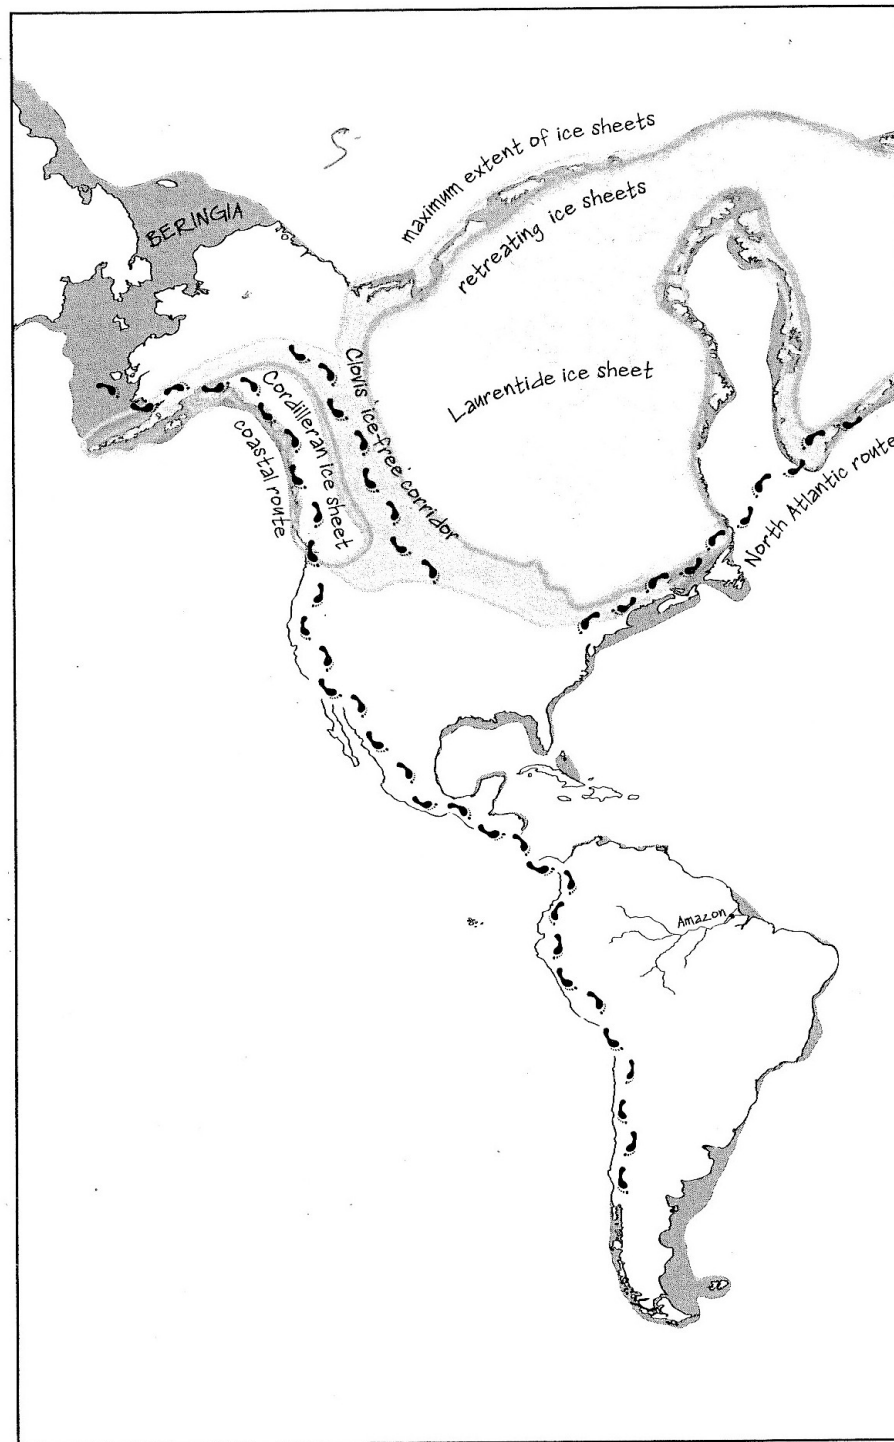

Patagonia the Americas

The Incredible Human Journey

- Taken from the book of the above title by Professor Alice Roberts
- Archaeology seems to show most of this occurred about 13000 years ago
- Whilst migration down the West Coast can be explained, the archaeology found in eastern USA and eastern Brazil throws some doubt on the migrants origins – did they perhaps come from Europe and/or Africa by sea (Atlantis might not be all myth)?

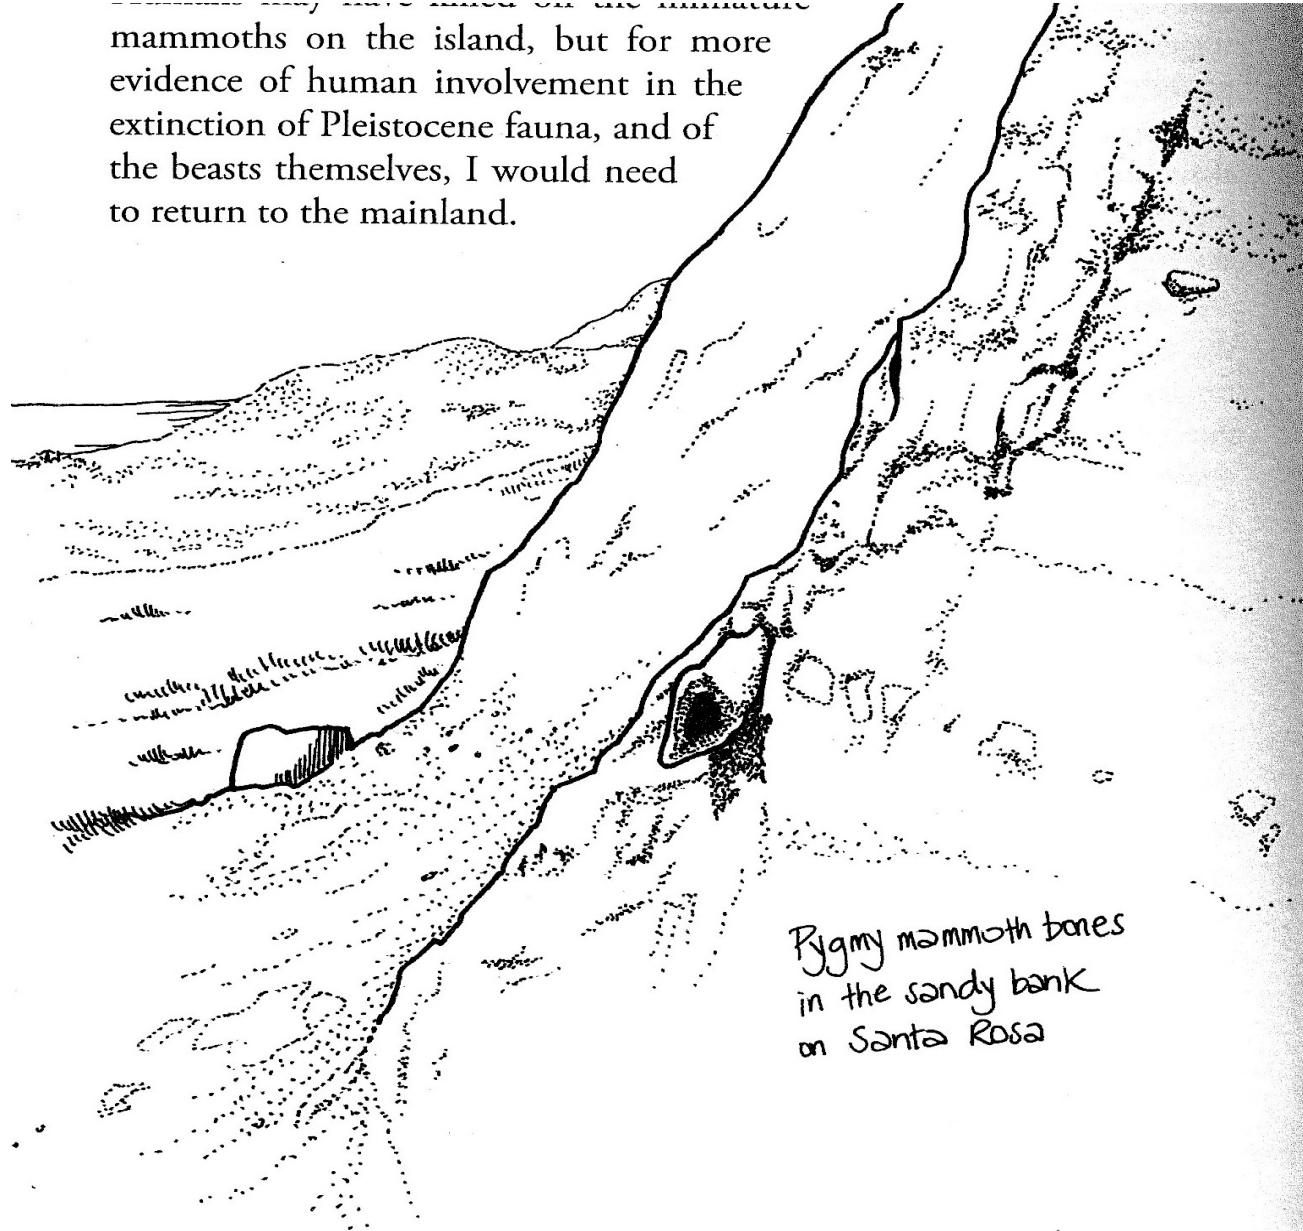

The Last *Routes past*

Ice Age *the Glaciers*

Pygmy Mammoth Bones Santa Rosa Island

... may have been on the miniature mammoths on the island, but for more evidence of human involvement in the extinction of Pleistocene fauna, and of the beasts themselves, I would need to return to the mainland.

Pygmy mammoth bones
in the sandy bank
on Santa Rosa
